

Lauren Anderson is a high school student from Grand Rapids, Michigan who has a love for story-telling. She wrote *The Unknown Tales*, first as something fun to do, but it then became her first ever published book. After being inspired by her love of fairy tales, Lauren wanted to give every character their own story. Everyone deserves to have their side told, even if it isn't the most famous part. Whether it is the villain's side, or the supporting character, they all add layers and depth to the infamous tales we all know and love.

Lauren Anderson wants to become much more than a fantasy writer, but a master of all genres. One specifically that she has in mind is realistic fiction/science fiction. Lauren has been working on many ideas since the age of fourteen and doesn't plan on stopping. This is only the first of many for Lauren and she can't wait to finish her next ideas and share them with the world!
